COLLECTION OVERVIEW

Replaceable shin slider  
Slider tibia sostituibile  
Slider tibia remplaçable

Dual-compound ventilated shin plate  
Protezione ventilata tibia a doppia densità  
Renfort tibia ventilé double mélange

Tech zipper closure

Chiusura con cerniera tecnica

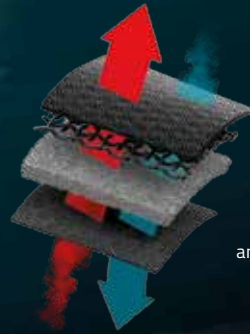

Fermeture éclair

### AIR-TECH

Lining with superior ventilation performance, structurally developed to be extremely breathable, anti-bacterial, quick drying

Fodera strutturalmente sviluppata per una estrema traspirabilità, protezione antibatterica e rapida asciugatura

Doublure conçue pour assurer le maximum de ventilation et salubrité au pied

Elastic accordion area  
Zona elasticizzata di flessione  
Insert élastique

Removable Nylon Slider  
Slider in Nylon rimovibile  
Slider remplaçable en Nylon

### TECH TOE

Innovative Falco one-piece moulded protection integrating toe-fingers shield and gear change pad

Innovativo puntale di protezione integrante scudo punta piede e paraleva

Pointe moulée dans une seule pièce avec la protection sélecteur de vitesse

### VSR TECHNOLOGY

Exclusive Vibram replaceable system integrating outsole with Nylon toe-slider  
Esclusivo sistema Vibram di integrazione tra suola e slider sostituibile in Nylon  
Système exclusif de construction semelle avec slider remplaçable en Nylon

Vibram high-grip compound  
Suola Vibram anti-scivolo  
Semelle Vibram antidérapante

### ESD | motion 2

Multiple-pieces integrated articulation system to provide additional ankle support  
Sistema integrato di articolazione per fornire supporto addizionale alla caviglia  
Système d'articulation intégré pour un soutien supplémentaire de la cheville

### AIR-TECH

Elasticized top gaiter  
Inserto polpaccio elasticizzato  
Insert élastique du mollet

Nylon-reinforced midsole  
uoletta di montaggio in Nylon rinforzato  
Semelle intercalaire de montage en Nylon renforcé

**TOP PERFORMANCE  
IN FOOTWEAR  
TECHNOLOGY**

**THE INNOVATION** - A new type of waterproof lining laminate to create an excellent micro climate in the shoe

**L'INNOVAZIONE** - Un nuovo tipo di fodera impermeabile laminata per creare un eccellente microclima nella calzatura

**L'INNOVATION** - Un nouveau concept de membrane étanche pour créer un excellent microclimat dans la chaussure

**THE BENEFIT**

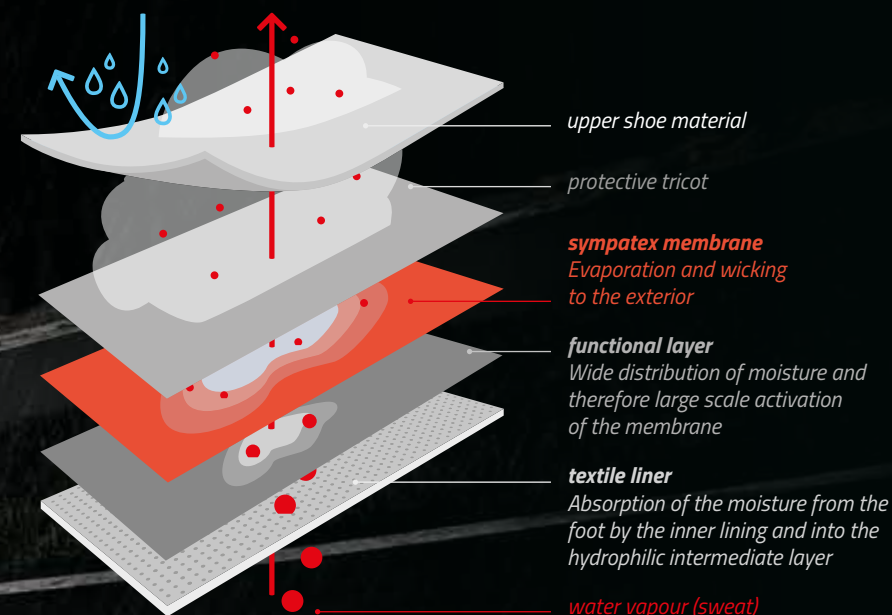

The well-known waterproofing specs of "Sympatex" membrane now bond with the exceptional moisture wicking properties of the hydrophilic intermediate layer. The higher the temperature and humidity difference, the greater the drying effect. Thus, this membrane works dynamically and adapts perfectly to the different riding conditions.

**IL VANTAGGIO**

Le provate caratteristiche di impermeabilità della membrana "Sympatex" ora si uniscono alle eccezionali proprietà di assorbimento dell'umidità dello strato intermedio idrofilo. Maggiore è la differenza di temperatura e umidità, maggiore è l'effetto di asciugatura. Pertanto, questa membrana funziona in modo dinamico e si adatta perfettamente alle diverse condizioni di guida.

**L'AVANTAGE**

Les caractéristiques d'étanchéité bien connues de la membrane "Sympatex" s'associent désormais aux propriétés exceptionnelles d'évacuation de l'humidité de la couche intermédiaire hydrophile. Plus la différence de température et d'humidité est élevée, plus l'effet desséchant est important. Ainsi, cette membrane fonctionne de manière dynamique et s'adapte parfaitement aux différentes conditions de conduite.

**Waterproofness:** The "Sympatex Moisture-Tech" membrane reaches a water column test of up to 45.000 mm.

**Wicking:** The "Moisture-Tech" hydrophilic molecular chains dissipate the water vapor to the outside. The effect increases dynamically with increasing temperature or humidity difference.

**Breathability:** The rapid absorption of the "Sympatex Moisture-Tech" membrane allows breathability performance equal to 45% less heat perceived compared to competition.

**Elasticity:** Polyester-based membrane (PES) allows > 300% stretch-tension compared to 100% level of Teflon-based membranes (PTFE).

**Impermeabilità:** La membrana "Sympatex Moisture-Tech" supera il test di colonna d'acqua fino a 45.000 mm.

**Assorbimento:** Le catene molecolari idrofile "Moisture-Tech" dissipano il vapore acqueo verso l'esterno. L'effetto aumenta dinamicamente con l'aumento della differenza di temperatura o umidità.

**Traspirabilità:** Il rapido assorbimento della membrana "Sympatex Moisture-Tech" consente prestazioni di traspirabilità pari al 45% in meno di calore percepito rispetto a prodotti concorrenti.

**Elasticità:** La membrana a base di poliestere (PES) consente una tensione di allungamento > 300% rispetto al livello del 100% delle membrane a base di Teflon (PTFE).

**Imperméabilité:** La membrana "Sympatex Moisture-Tech" atteint un test de colonne d'eau jusqu'à 45.000 mm.

**Absorption:** Les chaînes moléculaires hydrophiles "Moisture-Tech" dissipent la vapeur d'eau vers l'extérieur. L'effet augmente de manière dynamique avec l'augmentation de la différence de température ou d'humidité.

**Respirabilité:** L'absorption rapide de la membrane "Sympatex Moisture-Tech" permet des performances de respirabilité égales à 45 % de chaleur perçue en moins par rapport à la concurrence.

**Élasticité:** La membrane à base de polyester (PES) permet une tension d'étirement > 300 % par rapport au niveau de 100 % des membranes à base de Téflon (PTFE).

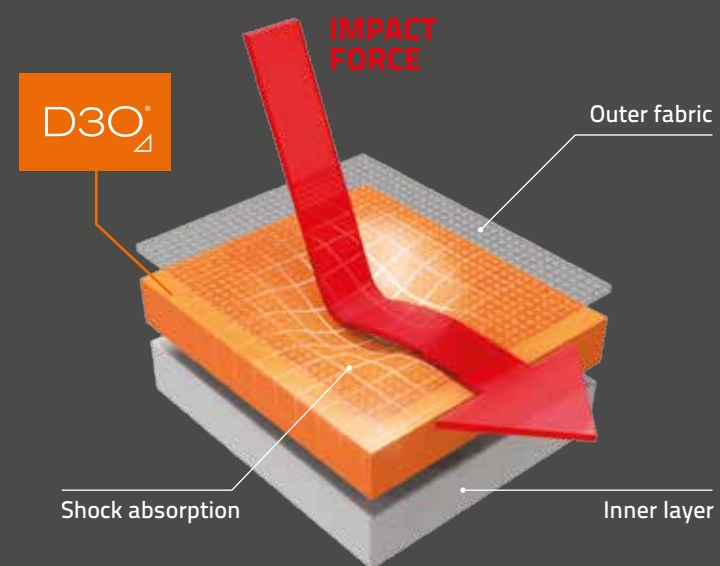

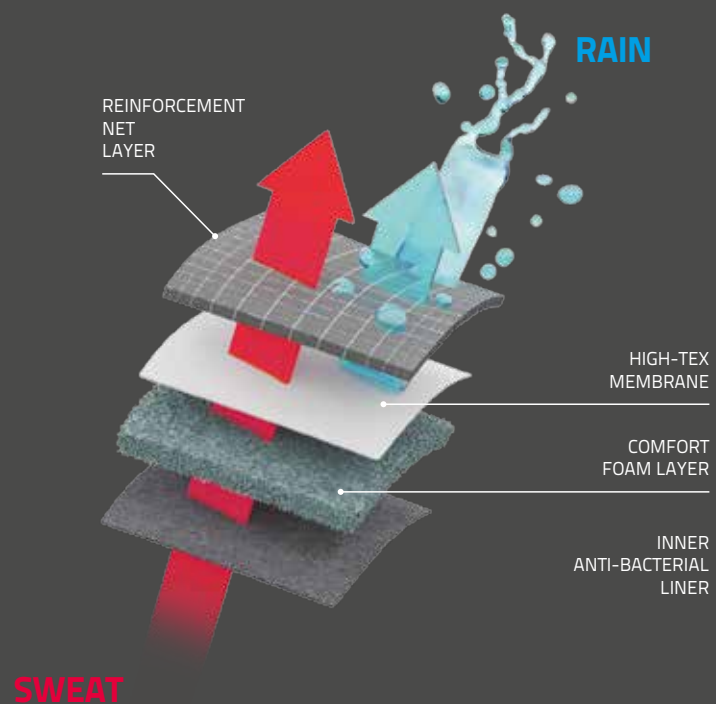

Falco proprietary membrane performs the water column test resistance up to 15.000 mm.

La membrana originale Falco supera il test di resistenza alla colonna d'acqua fino a 15.000 mm.

La membrana esclusiva Falco passe le test de résistance à la colonne d'eau jusqu'à 15.000 mm.

"D30™ impact protection" developed in snow-sports and military industry is first applied to motorcycle boots by falco. "D30™ intelligent molecules™" flow freely when moving slowly but on shock lock together in net to absorb impact energy. Transmitted force to ankle-foot area is significantly reduced thanks to d30™ exclusive support.

Il polimero intelligente D30™ sviluppato nell'industria militare e degli sport invernali è ora applicato sui migliori prodotti falco. Le molecole D30™ si legano in caso di urto favorendo l'assorbimento dell'energia di impatto. La forza negativa trasmessa alla caviglia viene ridotta in maniera significativa.

Falco pour premier s'impose dans la fabrication de bottes moto en utilisant le polymère intelligent D30™, développé et utilisé dans les sports d'hiver et l'industrie militaire. Il se compose par des molécules intelligentes qui absorbent l'énergie de l'impact. Son support au niveau des malléoles réduit significativement toute pression négative.

**ACF|men**

**ACF|women**

Craft constructive system of the boot around the last reproducing men's or women's foot anatomy. This technique allows to reach a higher level of comfort, to extend utilization time and to match different riding conditions.

Metodo costruttivo differenziato per uomo e donna in base alla diversa anatomia del piede. Questa tecnica permette un maggiore livello di comfort e personalizzazione di utilizzo.

Système de construction développé pour adapter la botte à l'anatomie du pied soit masculin que féminin.

The consolidated cooperation with performance outsoles Vibram has been now developed throughout new outsoles designs featuring "E.V.A. cushion" and "Megagrip" technologies.

- Qualitative E.V.A. foam delivers feather-weight cushioning to exceptional riding and walking comfort.
- "Megagrip" high-performance rubber compound offers, enhanced durability, unparalleled control on foot-pegs and optimized traction on both dry and wet terrains.

La consolidata collaborazione con le performanti soles Vibram si sviluppa ora attraverso nuove realizzazioni caratterizzate dalle tecnologie "E.V.A." e "Megagrip".

- La schiuma qualitativa E.V.A. offre ammortizzazione a peso contenuto per un elevato comfort di guida e di camminata.
- La miscela di gomma "Megagrip" ad alte prestazioni offre una durata superiore, un controllo impareggiabile della pedana e una trazione ottimizzata su terreni asciutti e bagnati.

La coopération consolidée avec les semelles performantes Vibram a maintenant été développée à travers de nouveaux modèles extérieures comportant les technologies en "Coussin d'E.V.A." et "Megagrip".

- La mousse qualitative en E.V.A. offre un amorti poids plume pour un confort exceptionnel de conduite et de marche.
- Le mélange de caoutchouc haute performance « Megagrip » offre durabilité supérieure, un contrôle inégalé sur les repose-pieds et une traction optimisée sur les terrains secs et humides.

## MADE IN ITALY FOCUS

Compared to past, are nowadays requested the perfect match of both fast-fashion performance development and time-to-market flexibility. In order to meet these strategic market demands a significant part of yearly production is featuring the quality-reliable "Made-In-Italy" origin and labelling. This objective is pursued by preserving traditional craftsmanship skills that have been transmitted through generations and joining them to state-of-the-art modern assembly techniques.

Rispetto al passato, oggi sono necessarie un maggiore livello di sviluppo stilistico e flessibilità nel time-to-market. Per soddisfare queste richieste strategiche del mercato, una parte significativa della produzione annuale presenta l'origine e l'etichettatura "Made in Italy" di qualità affidabile. Questo obiettivo viene perseguito preservando le tradizionali competenze artigianali trasmesse da generazioni e unendole a moderne tecniche di assemblaggio all'avanguardia.

Par rapport au passé, on demande aujourd'hui des plus hauts niveaux de développement de style et de flexibilité dans les délais de mise sur le marché. Afin de répondre à ces exigences stratégiques du marché, une partie importante de la production annuelle est marquée par l'origine et l'étiquetage « Made In Italy », signal de qualité fiable. Cet objectif est poursuivi en préservant les compétences artisanales traditionnelles transmises de génération en génération et en les associant aux techniques d'assemblage les plus modernes.

"Micro-Synth" upper and "High-Tex" waterproof membrane. P.U. moulded shin and calf plates. "Eso-Motion 2" rear articulation system. "D3O" backed ankle cups. Black alu-buckles and velcro closure. High-grip textured rubber sole.

Tomaia in "Micro-Synth" e membrana interna "High-Tex". Placca frontale e polpaccio in P.U.. Sistema di articolazione "Eso-Motion 2". Inserti malleolo in "D3O". Leve in alluminio micro-regolabili e sostituibili. Suola in gomma ad alto grip.

Tige en "Micro-Synth" et membrane "High-Tex". Plaques tibia moulées en P.U. et système d'articulation "Eso-Motion 2". Inserts malleole en "D3O". Crochets aluminium remplaçable. Semelle en caoutchouc moulée avec support de voûte renforcé.

"D3O™ intelligent molecules™" flow freely when moving slowly but on shock lock together in net to absorb impact energy.

Le molecole D3O™ si legano in caso di urto favorendo l'assorbimento dell'energia di impatto.

Les molécules intelligentes de "D3O" s'écoulent librement lorsqu'elles se déplacent lentement mais en cas de choc, elles absorbent l'énergie par impact.
